There is no safe level of Uranium waste in drinking water, and you won't be able to reach safe levels of uranium waste if you are exempting an aquifer from the safe drinking water act. By that very act you are saying that the people of that area don't deserve or need safe drinking water. This is court sanctioned murder of the native people in Black hills. You have stolen their children, taken their land and now you are polluting their water. I am strongly against this measure. It violates everything the EPA stands for. I can only assume you are doing this because of the current president. Stand up and have a spine.
